

# STRATIS

## Ryan Buchert

CTO STRATIS IoT, Inc. & BuLogics, Inc.

Ryan Buchert, entrepreneur, technologist, and mentor, has over 25 years of technology experience and holds numerous patents. He has an international reputation as the wireless industry expert for innovation in multi-protocol hardware applications, including Z-Wave, ZigBee, BTLE, and WiFi.

Buchert is the CoFounder and CTO of STRATIS and founder and CTO of BuLogics. Buchert developed innovations for the Internet of Things before the IoT was a thing. Embracing the idea that wireless integration could be dramatically simplified, Buchert focused his innovative entrepreneurial efforts on simplifying installation and enhancing user experience. His innovations greatly increased the sophistication and intelligence inside of the tools and devices themselves.

As a testament to his efforts, Buchert developed the methodologies and led the technology teams behind the unprecedented and unduplicated 65,000 module installation at The Wynn Hotel & Casino in Las Vegas, the largest wireless deployment in the world. From that experience, Buchert and his teams have developed the most pioneering and innovative methodologies and technologies for the wireless automation industry known.
