

STRATIS is the leading IoT platform for connected buildings and maximizes efficiency, user-friendliness, security, and return on investment. Co-Founders Felicite Moorman and Ryan Buchert built the software to answer the complex challenges in wireless access, energy, and automation management and control for MultiFamily and Student Housing. At the end of 2019, STRATIS has been installed in 1 in 5 new development units in the U.S. The company has been recognized by Inc. 5000 as a “Fastest Growing Company in America” and an Entrepreneur 360 as a “Best Company in America.”
